To Whom It May Concern

We have pleasure in recommending the ICAS Learner Management System.

Our experience with Strive Software International has been most rewarding. We were awarded a substantial soft skills training contract by the Absa banking group and in turn contracted with Strive Software International to facilitate a Learner Management System to manage the process.

As a prerequisite to the entire contract the Learner Management System had to integrate with the existing SAP system at Absa. We were impressed with the ability of the suppliers to provide this seamless integration with the SAP system which has been most effective.

From a user perspective it has been easy to use and manage and the system has met all our expectations.

A handwritten signature in black ink, appearing to read "Anthony Solomon", is written over a thin horizontal line.

Anthony Solomon  
MANAGING DIRECTOR
